## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Grey (US 3946636) in view of Place (US 2144895).

Grey discloses the claimed toggle bolt except for the anchor section having a threaded hole. Place teaches a threaded opening 4 adapted to engage the threaded screw shaft to perform a self-locking action (col. 4, l. 19-24). It would have been obvious at the time the invention was made to a person of ordinary skill in the art to modify the anchor of Grey's toggle bolt to have a threaded hole as disclosed in Place so the screw can tightly engage with the opening and perform a self-locking action, and so it will stay in place once installed.

3. Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grey (US 3946636) in view of Place (US 2144895) as applied to claim 1 above, and further in view of Shamah (US 4286497).

Regarding the claims, Grey modified by Place discloses the claimed toggle bolt except for the first and second adjustment holes having first and second protrusions.

Shamah teaches protrusions, which the examiner has labeled as P (see attached, marked-

up copy) in order to hold the trunnions 18 in place. It would have been obvious at the time the invention was made to a person of ordinary skill in the art to modify the toggle bolt of Grey as modified by Place by adding protrusions to the adjustment holes as disclosed in Shamah in order to better secure the first and second members 22 formed on the attachment ring to the adjustment holes, firmly locking the toggle bolt in place.

### ***Response to Arguments***

4. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
